

## EXOTIC DELIGHTS TO SHARE

Maza invites you on a journey with its shared dishes, inspired by European, Chinese and Middle Eastern cuisine. The restaurant is run by Robin Burnier, originally from China, and her husband Julien Burnier, of Egyptian and Swiss descent. "By drawing on the traditions of our different origins, we develop creativity in our dishes," Julien says. Their two sous-chefs regularly update the menu with gourmet pairings such as lamb shoulder spring rolls, whitefish tartare on herb crisps, and rump steak tataki with coriander.

## MUSIC DOES INDEED SOUND BETTER WITH BOOKS

Electro, funk, disco, jazz and rock vinyl records are mixed with books on art, graphic design, design and photography at Music Sounds Better With Books, or MSBWB for short. This concept store is the brainchild of three friends: DJs Louis and Julien (Upside Records) and graphic designer Dennis (Mosoma Books). "We sell new and second-hand vinyl records," Louis says. "We also organise events around music and books, such as book signings, meetings with artists and book presentations."

## A DOG'S DREAM STAY

Would you like to go to work with peace of mind, knowing that your four-legged friend is not home alone all day long? You're not alone. Woofy welcomes your furry friend for the day or for longer stays during holiday breaks. "We take a different approach to a dog kennel through our educational enrichment program," says founder and manager Melis Ataol. "We have four rooms offering experiences that promote sensory enrichment, physical stimulation, relaxation and socialisation." The dogsitting centre can accommodate up to 19 dogs, who get multiple walks a day. Four last-minute spots are always available.
